

**Please amend the specification as follows:**

Please amend the first full paragraph on page 11 to read as follows.

Turning now to Figures 1 and 2, a papermaking apparatus **11** is shown comprising a former **13**, which receives a paper slurry from headbox **12**. A sheet is formed as the former **13** proceeds in the machine direction **21** as shown in the right side of Figure 1. Vacuum apparatus **15** transfers the sheet which is being formed (not shown) to the first carrier fabric **14**. Then, the running web proceeds along the direction arrow **23** to the vacuum apparatus **16**, which transfers the running web to a second carrier fabric **17**. The machine direction **22** is shown by reference to the arrow **29**. The dryer **18**, is the structure around which the second carrier fabric **17** travels in drying the running web. A dryer hood **19** is shown over the top portion of the dryer **18**. Finally, a product **20** emerging from the papermaking apparatus **11** as shown on the left side of Figure 1.
